

Gradle Installation: -

Step #1: Go to browser type Gradle download and hit enter

Step #2: Click on the Installation Gradle

Step #3: Then scroll down a little bit then click on Download from Installing manually section

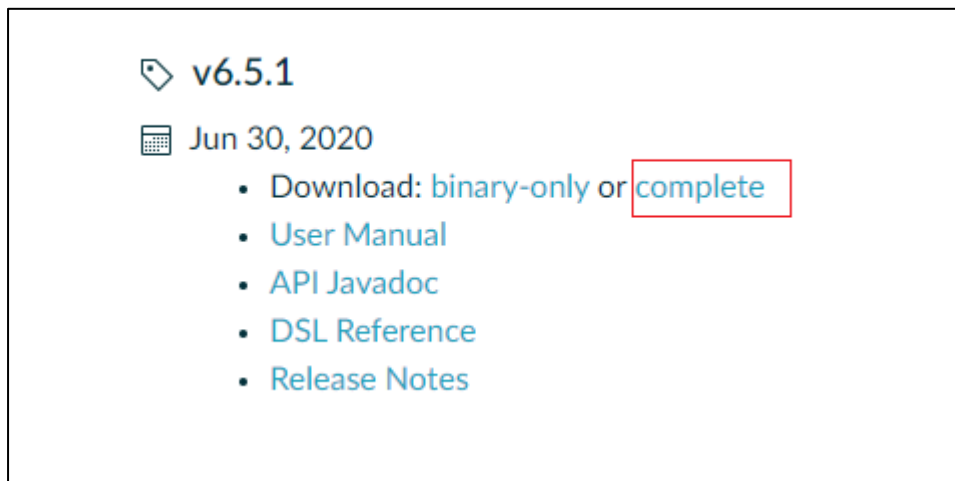

Installing manually

Step 1. [Download](#) the latest Gradle distribution

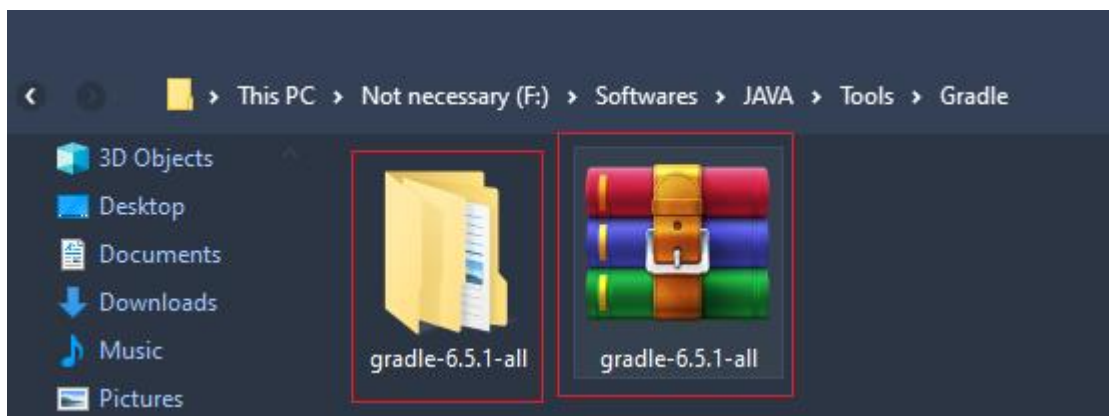

The current Gradle release is version 6.5.1, released on 30 Jun 2020. The distribution zip file comes in two flavors:

- [Binary-only](#)
- [Complete, with docs and sources](#)

Step #4: Then again scroll down a little bit, go to your required version click on complete for download [\[Download\]](#)

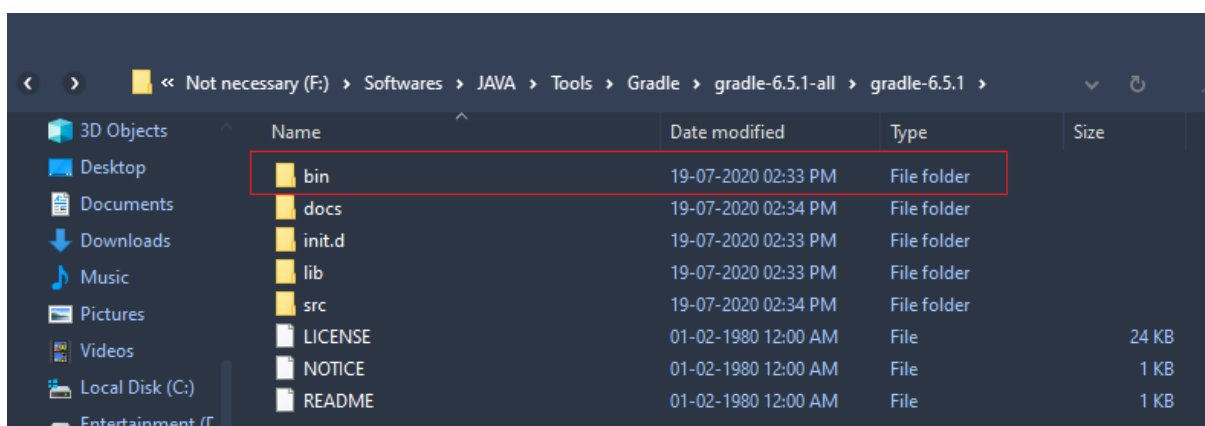

Step #5: After downloading you will get a ZIP file, extract it

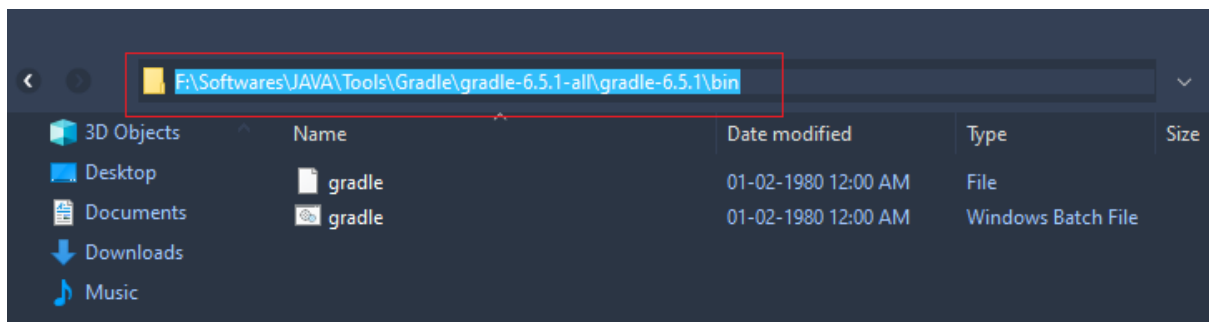

Step #6: Go inside the extract folder and then go to bin folder

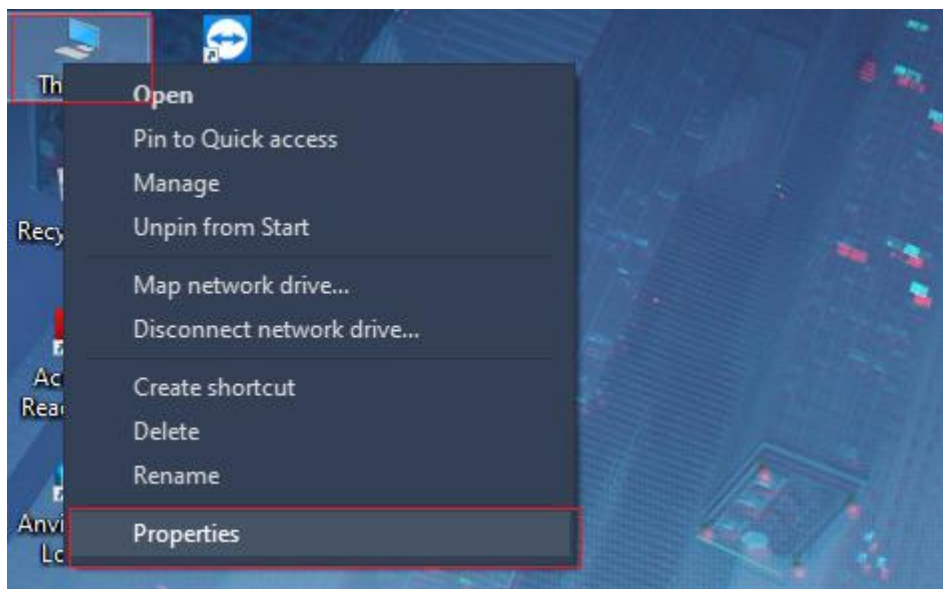

The folder structure like <Gradle home>\gradl-6.5.1\bin

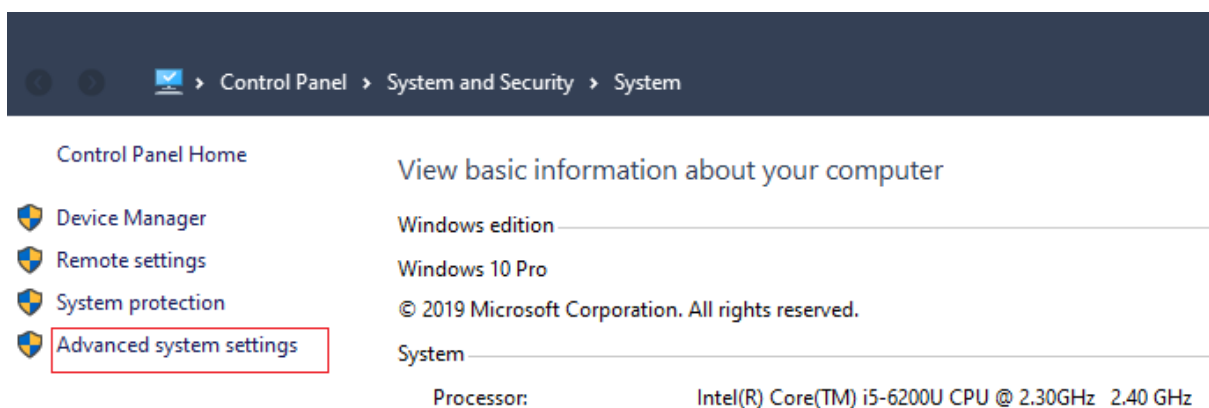

Step #7: Copy the address from address bar of the bin directory

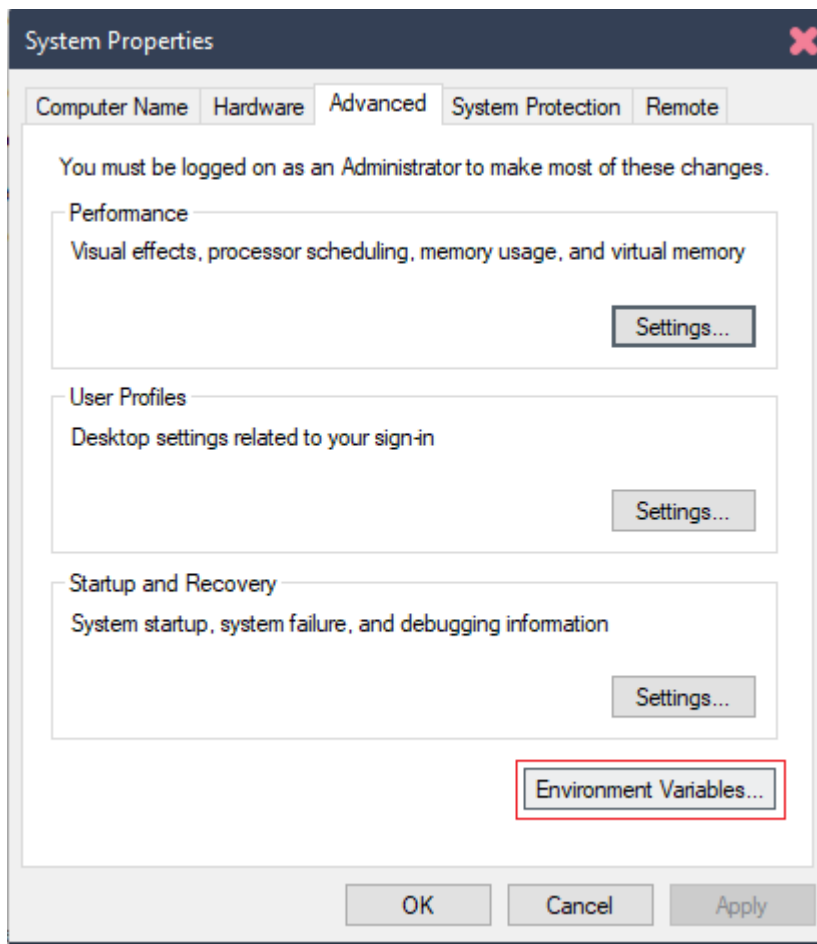

Step #8: Then right click on you This PC, click on Properties

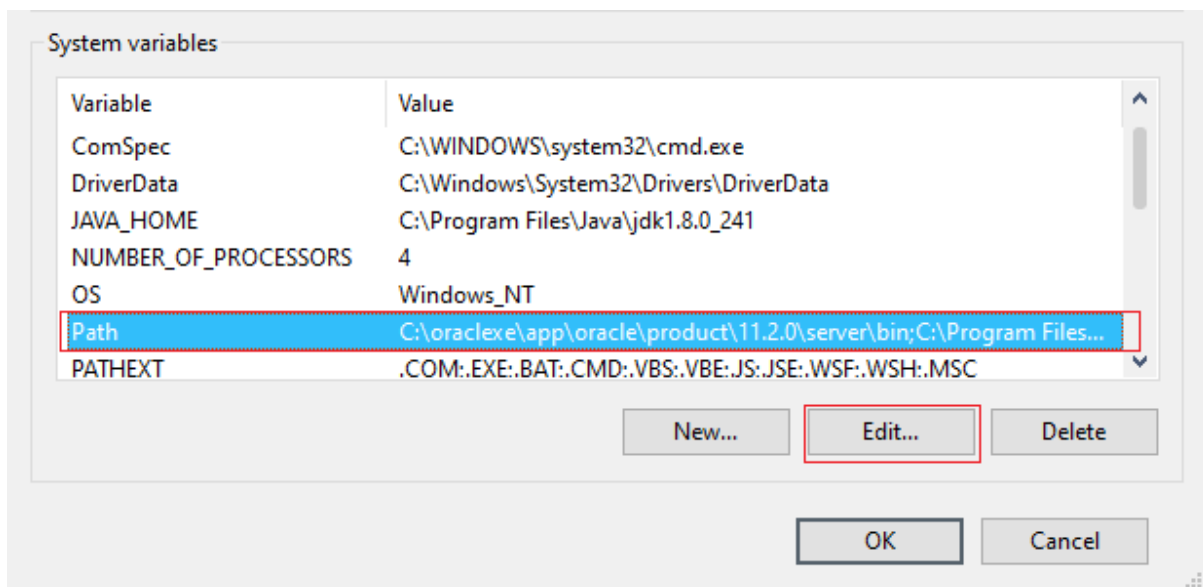

Step #9: Click on the Advanced system settings

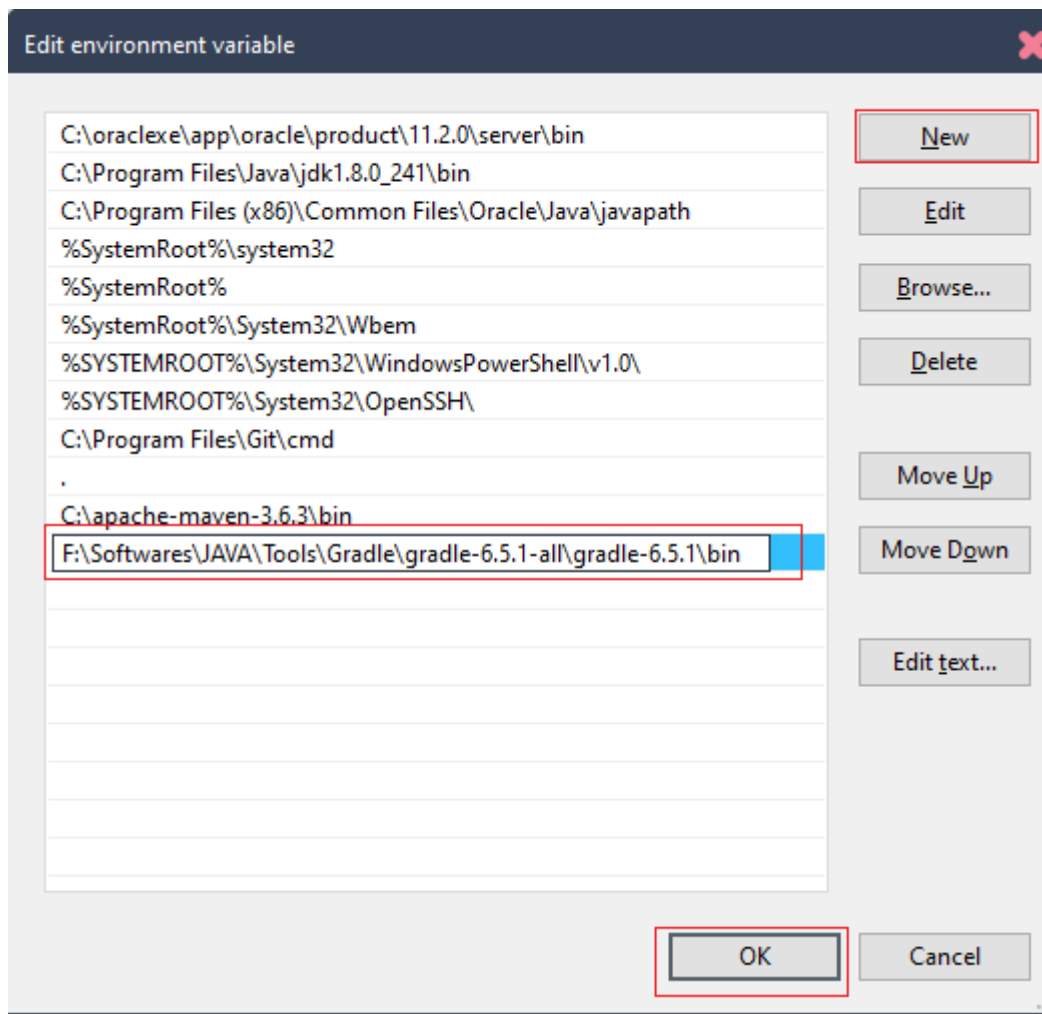

Step #10: Then click on Environment Variables

Step #11: Click on your Path variable from System variables section, then click on Edit

Step #12: Click on New, and past the "<Gradle Home>\bin" address there, then click on OK

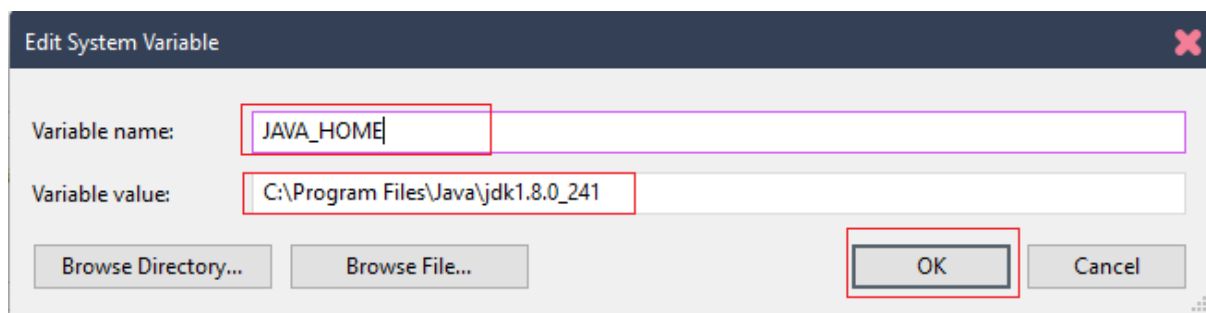

Step #13: Then click on New from System variable section, Give the

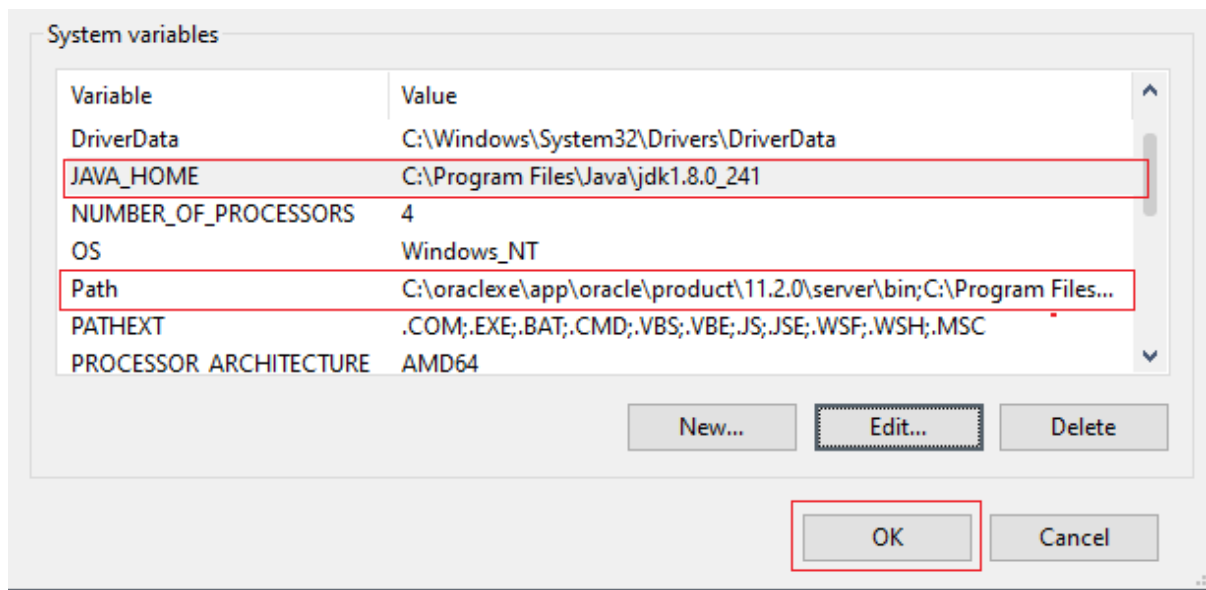

Variable name: JAVA_HOME

Variable value: <Java home>\jdk<version>,

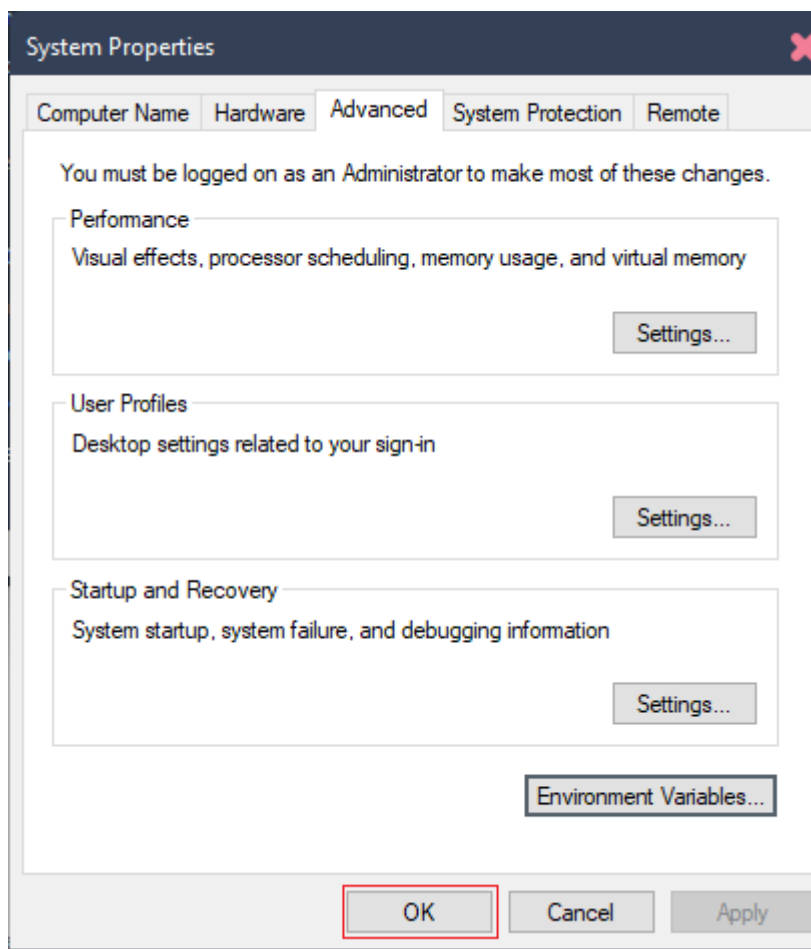

like below then click on OK

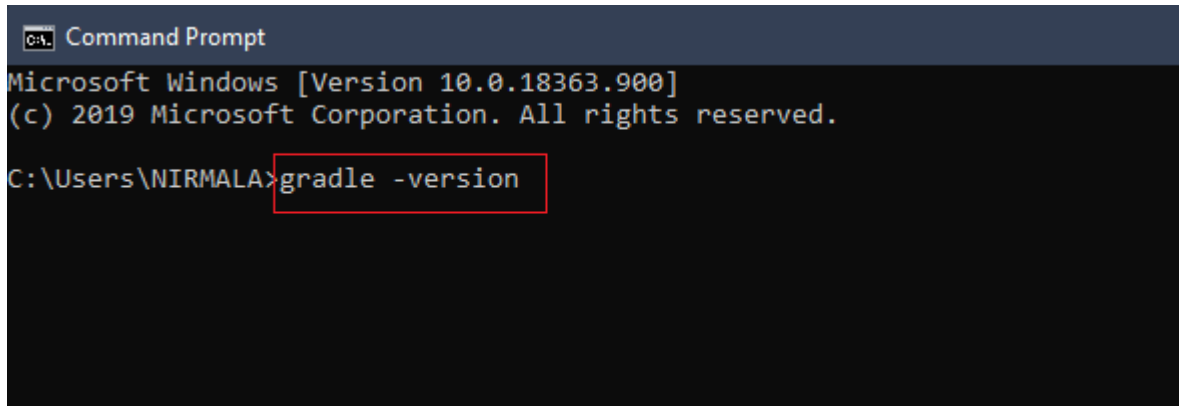

Step #14: Now you can see your both Path and JAVA_HOME variable is ready then click on OK

Step #15: Again, click on OK

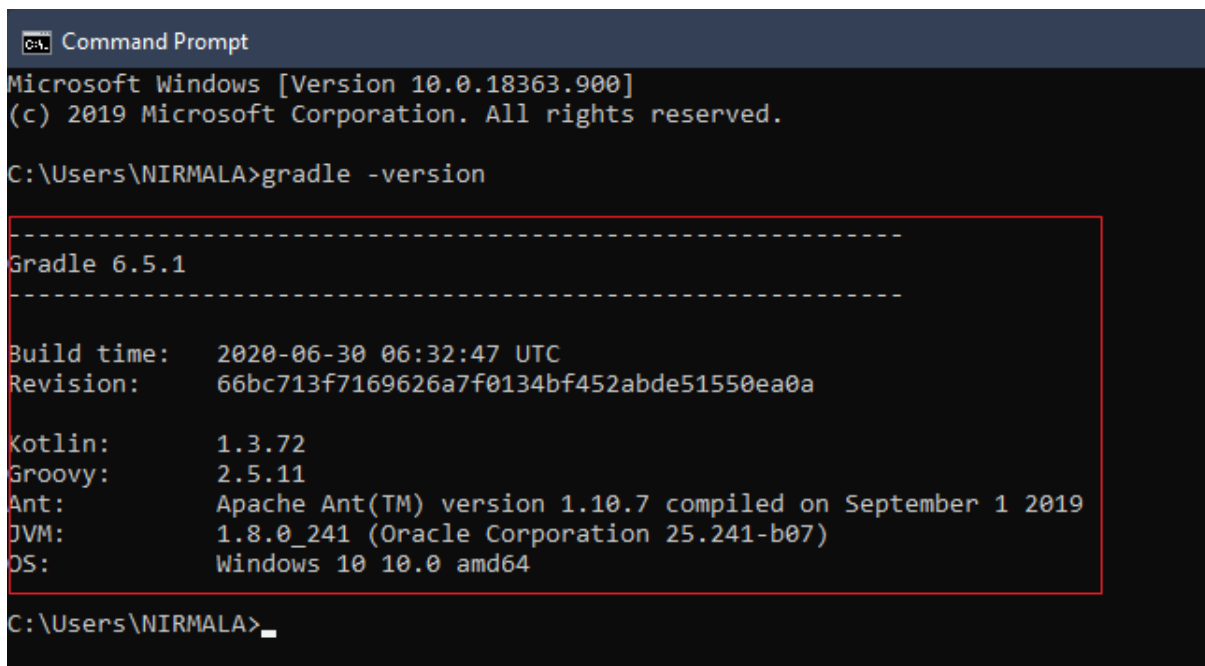

Step #16: Then open Command Prompt type the “gradle -version”, hit enter to know that Gradle has configured or not

```
C:\Users\NIRMALA>gradle -version
```

Step #17: Now you can see the messages like below and your Gradle is ready now

```
C:\Users\NIRMALA>gradle -version

-----
Gradle 6.5.1
